Privacy

What data CENZURA collects, how we use it and how you can manage it.

Last update: October 19, 2025

What does your application do?

CENZURA is an open-source Discord bot.

Our bot contains various utility features such as but not limited to:

- User Info – Shows user's discord profile in an embed.
- Server Info – Shows the current server's profile in an embed.
- Sticker – Allows users to create stickers within the bot.
- Last.fm – Various Last.fm related commands.
    - fm – Shows's users currently scrobbled track.
    - trackinfo – Shows's information about the currently scrobbled track.

You can optionally login with a Last.fm account.

What data do you store?

When someone uses to the bot, we store the following Discord data:

- Discord user ID
- That they are in that server
- Their nickname or name on that server

We optionally store the following Last.fm data for every user that chooses to log into Last.fm:

- Username – Used to retrieve user's scrobbles when Last.fm related commands are used.
- Session token – Used for verification.

When the bot joins a server, the following data from that server is stored:

- Server name
- Server ID

When specific settings for a server channel are set, the following data from that channel is stored:

- Channel name

- Channel ID

When someone uses a command, the command log stores this:

- Discord name or nickname of the user executing the command
- Discord user id
- Server name
- Discord server id
- Discord channel id
- The text and options in the command

For what purpose do you store it?

To identify who is calling the command and get the appropriate parameters to customize their command.

Server data is used for commands that provide server-wide leaderboards and statistics.

This data is stored for caching purposes and to ensure our commands are performant.

Command logs are used for statistics, debugging and helping people with bug reports.

For how long do you store it?

Settings data and command logs: Forever, or until deleted.

Server data: Forever, or until the bot is kicked from the server.

What is the process for users to request deletion of their data?

Users can request deletion of their data by emailing us at geje@poligon.lgbt.

What systems and infrastructure do you use?

CENZURA is currently hosted on premises in Poland.

How can users contact you with security issues?

Through Github issues or by emailing us at geje@poligon.lgbt.

Does your app utilize other third-party auth services or connections?

We provide auth services to the following services:

- Last.fm

Extra info

Personal CENZURA data will never be shared with any 3rd party services unless explicitly specified.

If you have any questions after reading all this feel free to contact us by email or open an issue on our Github.
